

I respectfully urge the FCC to reject the NAB's petition 04-160. Please support the right of free speech, including traffic reports and weather. The variety of shows on XM radio speak of all points of view of popular & sometimes, unpopular subjects. But that is for the listener to decide and support, not the NAB and the large communication owners, lobbyists, and other political "clubs."

Is this not like trying to force a company not to sell what it wants to sell if the company is not breaking the law selling it and there is a market for it. Don't squash technology improvement for someone else's control over what this country is "allowed " to hear.
